

REMARKS

This responds to the Office Action mailed on March 8, 2005, and the references cited therewith.

Claims 1-41 are canceled, and claims 42-56 are added; as a result, claims 42-56 are now pending in this application.

As explained in the Background of the Invention section of the present application, cache based systems for condensing communications are known in the art. U.S. Patent No 6,178,461, cited by the Examiner, is such a cache based system. As further explained in the Background, it is known to use a base version of a document and transmit a difference between the base version and the requested document. In contrast to the prior systems, the present application describes creating classes, selecting and updating class base versions, and maintaining security.

New claims are presented herein to more clearly focus on the invention and speed prosecution of the application.

CONCLUSION

Applicants respectfully submit that the claims are in condition for allowance, and notification to that effect is earnestly requested. The Examiner is invited to telephone Applicants' attorney at 208-331-4537 to facilitate prosecution of this application.

If necessary, please charge any additional fees or credit overpayment to Deposit Account No. 19-0743.

Respectfully submitted,

KONSTANTINOS PSOUNIS ET AL.

By their Representatives,

SCHWEGMAN, LUNDBERG, WOESSNER & KLUTH, P.A.
